

### The Missing Link

- **Conflicting KPI definitions** create competing versions of the truth across business functions and leadership teams
- **Lack of a centralized metrics framework** undermines consistency, governance, and decision confidence
- **Manual KPI onboarding and alignment processes** slow reporting cycles and increase operational overhead
- **Limited metric lineage and auditability** reduce transparency, accountability, and regulatory readiness

## REPORTX

ReportX moves enterprises from fragmented KPI definitions to governed business metrics, enabling trusted reporting and aligned decision-making.

One Governed Metric Definition Across the Enterprise

## The Path to Impact

### Databricks-native Semantic Governance:

Built on Unity Catalog using Metric Views with centralized governance and reusable KPI definition

### Consistent Metrics across AI & BI:

Same governed KPI definitions across Power BI dashboards, Genie analytics, and regulatory report downloads - with zero drift and built-in regulatory format compliance. Self Serve BI.

### Rapid BFSI Deployment Readiness:

Ready-to-deploy BFSI metric accelerators reduce onboarding and implementation effort significantly

## Platform Highlights

Enterprise  
Lakehouse  
Platform

PII & DPDP  
Compliance Engine

MDM/Golden  
Records Layer

Secure SQL &  
Data Marts

CDC &  
Streaming  
Ingestion

## What ReportX unlocks

**30+**

Pre-built BFSI KPIs

**16**

Live Financial Data Marts

**3X**

Faster KPI Standardization

## Why Hoonartek

16 years of Data and AI experience

Built from real enterprise deployments

Databricks-native accelerators

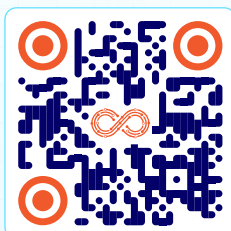

Proven outcomes in enterprises across verticals

## Success Story

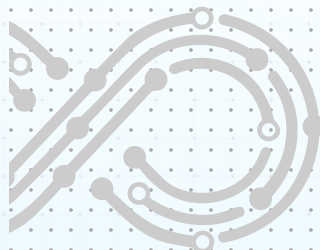

Hoonartek engineered a secure, governed Databricks Lakehouse for a leading private sector bank to unify 1.5 PB of data across 120+ siloed systems. The solution protected 2,200+ exposed PII elements with automated, DPDP-aligned privacy controls and eliminated manual reporting friction. This modernization compressed reporting cycles by 98% (shrinking data delivery from 30 hours to just 45 minutes) while achieving full production launch 9 months ahead of schedule.
