

# TRUSTX

An intelligent trust layer for data & AI for reliable insights and faster decisions

## The Missing Link

- **Inconsistent** data quality validation workflows across enterprise pipelines.
- **Manual** reconciliation processes - slow and error-prone tracking.
- **Limited** audit visibility and technical traceability across data assets.
- **Missing** centralized data quality monitoring across operational layers.

## TRUSTX

TrustX moves enterprises from reactive data quality management to proactive data trust, enabling reliable insights, resilient AI models, and faster business decisions.

Govern Every Dataset from Source to Consumption

## The Path to Impact

### Databricks-native DQ framework:

Configuration-driven quality controls with no external tooling required

### Automated reconciliation engine:

Source-to-target validation with intelligent variance detection

### Built-in Audit Logging & Traceability:

Full execution history; transformation-level audit trail

## Platform Highlights

Cloud-Native Scalability

AI/ML Risk Scoring

Real-Time Analytics APIs

Automated Compliance

Self-Service Power Users

## What TrustX unlocks

**100%**

Trusted Enterprise Data

**90%**

Automated Data Reconciliation

**Day 1**

Audit-Ready

## Why Hoonartek

16 years of Data and AI experience

Built from real enterprise deployments

Databricks-native accelerators

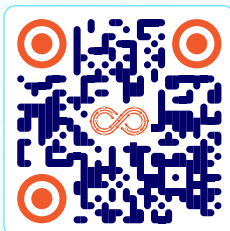

Proven outcomes in enterprises across verticals

## Success Story

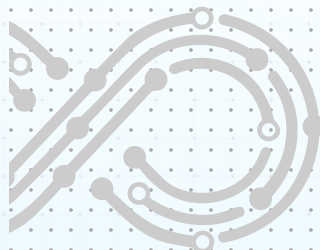

Hoonartek executed a cloud-native data modernization for a leading microfinance bank hampered by an unscalable legacy on-prem system, Excel-dependent analytics, and zero real-time collections visibility. Hoonartek deployed a modern Databricks platform integrated with real-time analytics APIs, automated compliance tracking, and an AI/ML risk-scoring engine using TrustX. This modernization compressed time-to-market by 35% and onboarded 2,000+ power users while achieving 100% data catalog coverage and eliminating manual regulatory effort.
