

DATAHAVEN

Governed data collaboration without compromising privacy

The Missing Link

- Fragmented data sharing processes slowing collaboration across business functions, and stakeholders environments
- Lack of a governed collaboration environment increases privacy, security, and compliance risk
- Limited visibility into data access and usage weakens governance and accountability
- Inability to securely share and commercialize data assets hindering new revenue and business growth opportunities

DATAHAVEN

Data Haven transforms enterprise data from a protected asset into a monetizable advantage through governed sharing and collaboration.

Govern Every Query | Protect Every Dataset

The Path to Impact

Databricks-native Clean Room

Built on Delta Sharing with firewall-enforced query validation and zero raw data exposure

Multi-tenant Architecture

Scales across group companies and advertisers as tenants, with each workspace governed independently.

Audit-ready Data Operations

Built-in approval workflows, snapshot logs, query audit trails, and access-based controls from Day 1.

Audit-ready Operations

Why Hoonartek

16 years of Data and AI experience

Built from real enterprise deployments

Databricks-native accelerators

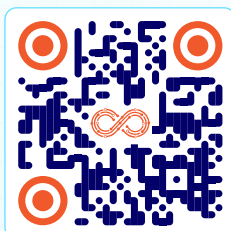

Proven outcomes in enterprises across verticals

Success Story

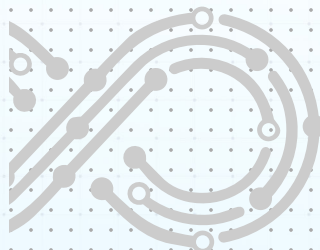

Hoonartek deployed DataHaven at a leading semiconductor manufacturer to enable external partner analytics without exposing raw data. Utilizing Unity Catalog, Delta Sharing, and attribute-level masking across a multi-cloud architecture, the solution delivered secure, cross-organizational collaborative analytics with zero raw data exposure.
